

High-speed Inkjet Franking Machine

neopost IJ75

Boosted power
for **mail** processing

neopost IJ75

When time presses to post out the mail, IJ75 sweeps obstacles aside with its speed, flexibility and easy operation. Peak loads just melt away with franking at 10,800 envelopes an hour. And a host of user benefits ensures professional mail handling at minimum cost and maximum productivity.

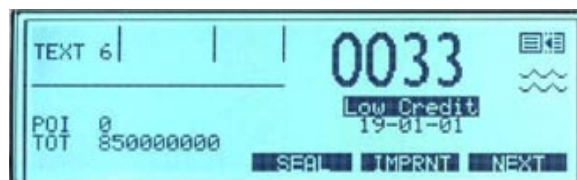

High power franking extends mailing boundaries

→ With a franking speed of 180 items a minute, a special mailing to your Top 1000 prospects takes under 6 minutes. What a way to build new business !

Exact postage and cost tracking

→ IJ75 interfaces with Neopost electronic scales for exact calculation of correct postage to worldwide destinations, with automatic setting of the franker.

→ Then 200 inbuilt accounts provide easy allocation and tracking of postage costs by month, department or postal service – whatever you wish.

Extra versatility, greater productivity

→ The optional power feeder handles items up to C4 size (portrait or landscape), and up to 16mm thick. That gives you easy automatic handling of chunky flats as well as ordinary envelopes – a major time and labour saver. It also reduces the risk of stoppages from oversize items.

→ Self-adhesive franked labels from an automatic dispenser enable you to deal quickly with big and awkward mail.

No training needed!

→ IJ75 is sleekly styled and unusually quiet – so it's compatible with office and not just mailroom environments.

→ A clear and helpful display with simple logical controls makes it easy to operate. Even casual users quickly feel at home with it – so all those extra facilities are sure to be exploited.

→ Handy menu-driven programmes and friendly prompts ensure every user gets maximum benefit. Clean smudge-free printing and fast cartridge re-inking mean that everyone is happy to use it.

Customise your mail, create a professional image

→ Clean crisp Neopost inkjet franking means you project a professional image – specially when using IJ75's highly versatile digital overprint facilities.

→ Advertising slogans, logos, special promotional messages and your choice among a range of preset overprints can be added beside the frank mark.

→ Spare messages can be stored on digital memory cards and loaded into the machine whenever you want them. And one-off text messages can be tapped in direct onto the IJ75 keypad.

Specifications

→ Productivity features
